

In partnership, LABBB presents...

amplifi Adaptive Music Programs - group music and performance-based programming designed for individuals with intellectual and developmental disabilities to learn and express themselves through music. Our programs culminate with a live performance opportunity for all participants!

Participants will...

- *Engage* in themed curriculum units designed to be age appropriate and accessible to all learners.
- *Express* themselves through physical and vocal warm-ups, social skill building activities, and music!
- *Reflect* upon individual and group level progress.
- *Collaborate* to write original songs and deliver a live performance for friends and family!
